# FEELING STRESSED, STUCK AND FRUSTRATED? CAN'T SEEM TO GET THE LAW OF ATTRACTION TO WORK FOR YOU? MAYBE YOU'RE READY FOR A CHANGE!

## CHANGE IS POSSIBLE!

Many people were introduced to the Law of Attraction with book "The Secret," but failed to see real change in their lives. "Change" is a powerful new documentary that explores the power of the human brain and our ability to create the changes we desire. Including real life stories of healing and personal growth, as well as scientific and spiritual insights, this inspiring documentary offers a new viewpoint on what we are capable of as human beings. This is the LifeParticle effect.

The LifeParticle Effect is based on the idea that the entire universe is ultimately made up of the same stuff - elementary particles of energy and consciousness, or, LifeParticles. When you access the world of LifeParticles, you tap into a vast reservoir of change potential. From here, every possibility of your imagination becomes the impetus for personal transformation. It's simply up to you to create it.

Featured thought leaders such as Neale Donald Walsch, Dr. Stuart Hameroff, Ilchi Lee and Dr. Mariale Hardiman share their insight and techniques to effect real change in our lives and in the world. Individuals who have experienced the LifeParticle effect in their own lives share their personal stories. Exciting new perspectives combining scientific explorations of modern physics and neuroscience with mind/body traditions present viewers with practical tools for making real change.

Change: The LifeParticle Effect is a new type of film. It is part documentary, part drama, part science and part spirituality. In short, it reflects on how to turn your life in a positive direction. Exploring the connection between consciousness and matter, and how the brain works--how we use it as a tool in the creation process! This film can help you pause, step back and reflect on why life isn't it going the way you intended.

"Everything exists as potential, just waiting for individuals to choose how they want life to present itself." - **Ilchi Lee**

# INTERVIEWS

## ILCHI LEE

Ilchi Lee is an author, educator, mentor, and innovator devoted to developing the awakened brain and teaching energy principles. He has published over 33 books, including *The Call of Sedona*, a New York Times Bestseller. Lee is the creator of several wellness methods, including Dahn Yoga and Brain Education. Lee has also founded several for-profit and non-profit entities devoted to mind-body training, wellness and peace, including the International Brain Education Association (IBREA), the Sedona Mago Retreat Center, the Korea Institute of Brain Science and the University of Brain Education.

## NEALE DONALD WALSCH

Neale Donald Walsch is the author of the New York Times bestselling “Conversations With God” Series, 12 other published works and a number of video and audio programs. His work has touched millions of people, inspiring them to make important changes in their lives.

## STUART HAMEROFF, M.D.

Dr. Stuart Hameroff is an anesthesiologist and professor at the University of Arizona well known for his promotion of scientific study of consciousness. Dr. Hameroff was featured in the hit documentary “What the Bleep Do We Know”?

## MARIALE HARDIMAN, ED.D.

Dr. Mariale Hardiman is Assistant Dean for Urban School Partnerships and Chair of the Department of Interdisciplinary Studies at The Johns Hopkins University School of Education. Dr. Hardiman is co-founder and director of the Johns Hopkins University School of Education’s Neuro-Education Initiative. Dr. Hardiman presents nationally and internationally on topics related to the intersection of research in the neuro and cognitive sciences with effective teaching strategies, including meaningful integration of the arts.

## GERARD J. MAREK, M.D., PH.D.

Dr. Gerard Marek is Psychiatrist, Pharmacologist, and Director in Clinical research at Abbott Laboratory. A Yale University post-doctorate and NARSAD Young Investigator awardee, his psychiatric studies focus on the metabotropic glutamate receptor in a region of the frontal cortex, and its role in neuropsychiatric illness.

Dr. Younglim Lee is a former faculty member of Institute of Psychiatric Research, Indiana University School of Medicine. After earning her Ph.D. in Neuroscience, she spent the next twenty years in medical education and research. Specializing in mood disorders, her work focused on depression and anxiety.

## YOUNGLIM LEE PH.D.

## MELISSA KOCI

With years of experience as a Dahn Yoga Instructor, Melissa Koci has served as National Trainer for Dahn Yoga's Energy Principles program and as Community Coordinator for the Energy Meditation Circles.

Michael Munson is Regional Director for the Boston area Dahn Yoga centers. For more than ten years Michael has worked with thousands of people nationwide who are seeking empowerment through yoga, meditation, and meaningful service in local communities.

## MICHAEL MUNSON

## DAVE BEAL

Dave Beal is the NY Coordinator for Power Brain Education (PBE) and a national Brain Education (BE) trainer. Dave has spent the last seven years training thousands of educators, administrators, parents and students in how to utilize their fullest brain potential through BE. He has led experiential BE sessions and lectures at the United Nations and led multiple workshops for CSA and NYCESPA, New York City unions for school administrators.
